

Abstract

An albumin containing fraction having a reduced prekallikrein activator (PKA) content and a method of manufacturing same comprising the steps of:

- 5 (a) reconstitution of paste V (Cohn fractionation),
- (b) performing a concentration step of the fraction obtained in step (a),
- (c) heating the fraction obtained in step (b) in a range of from 50 °C to 70 °C for a sufficient time to pasteurise the fraction, and
- (d) optionally filling of the obtained fraction for use.
